### **About Sarbanes-Oxley**

The Sarbanes-Oxley Act (2002), named for the two Congressmen who sponsored it, was passed in response to accounting scandals surrounding Enron and other companies.

Enacted to restore public confidence and trust in our nation's corporate sector, the Act demands greater accountability for financial management and reporting practices for companies registered with the Securities and Exchange Commission (SEC). The Act charges management with the responsibility for annually assessing the design and operating effectiveness of internal control over financial reporting and requires external auditors to annually audit and issue a report on the effectiveness of the company's internal controls.
