

YOUR NETWORK HAS BEEN BREACHED. IS YOUR LEADERSHIP TEAM PREPARED?

Are you and the rest of your executive team prepared to take immediate action in the event of a breach or cyber attack? Can you afford not to be? Securance can ensure you are ready.

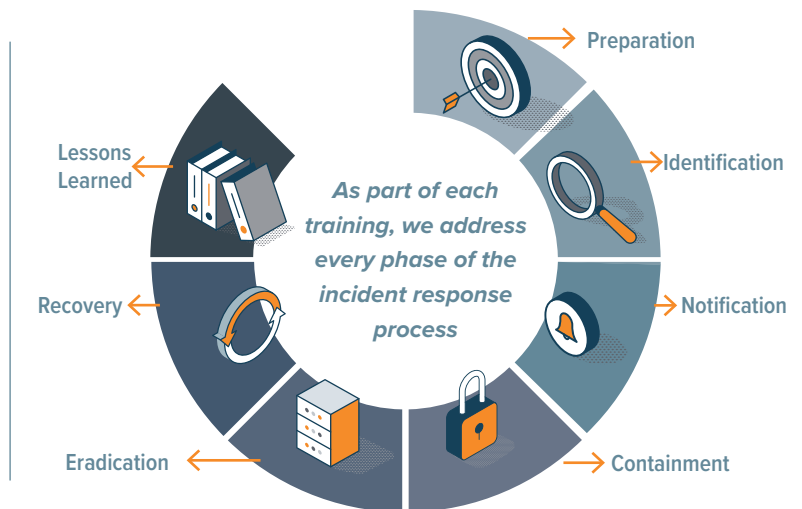

EXECUTIVE CYBERSECURITY INCIDENT RESPONSE TRAINING

Securance provides specialized incident response training and workshops for executives, leaders, and stakeholders in every department of an organization to ensure they know where their responsibilities lie and feel secure in how they need to respond to an unplanned incident.

Executive Training Options

Securance offers executive-level incident response training on site or remotely to suit your organization's needs. We provide:

- ▶ **Workshops** customized to your organization's requirements.
- ▶ **Tabletop Exercises** that are scenario-based (e.g., simulating a ransomware attack).
- ▶ A stand-alone **Training Template** that includes a fully customizable PowerPoint deck that can be edited or adapted and delivered by your organization staff as needed.

Why is Executive Incident Response Training So Important?

Leadership during a critical cyber incident differs from day-to-day office operations. During an attack, you will play a pivotal role in coordinating a response and ensuring efficient use of available resources. Your ability to maintain composure, make informed decisions, and communicate clearly will contribute significantly to a well-coordinated, efficient response and successful incident resolution. To do that, you need to be “read in” on the process and know what to expect. The right training will prepare you to be the leader you need to be.

FOR INCIDENT RESPONSE PREPAREDNESS, THINK SECURANCE

Securance can ensure you and your leadership team are as prepared as possible in the event of a security incident. Don't be caught without the ability to respond quickly and decisively.
